

STUDY OPPORTUNITY

KLEEFSTRA SYNDROME

GOALS

- Better understand Kleefstra Syndrome
 - Symptoms
 - Specific genetic changes
- Identify ways to measure success of future treatment trials

There is no direct benefit to participating in this research study

NATURAL HISTORY STUDY OF INDIVIDUALS WITH KLEEFSTRA SYNDROME

ELIGIBILITY

- Individuals ages 2-21
- Individuals with a disease-causing gene change in *EHMT1*

WHAT'S INVOLVED

- 3 annual visits with the study team
- Neurobehavioral assessments and questionnaires
- Sharing medical records
- Optional EEG, photographs, and sample collection

This research is being
conducted by
Siddharth Srivastava, MD
